BLOOD TELLS

Eighty years ago the founders of Rogers Brothers Seed Co. adopted the slogan "Blood Tells" as the foundation on which to build their new seed business. While we in Rogers Brothers have repeatedly modernized and streamlined our various operations since that time, our slogan has remained the same. It is as timely and all inclusive in statement of seed policy today as it was three generations ago.

In the seed business customer confidence in their source of supply is of utmost importance. The slogan "Blood Tells" gives assurance that the full scope of our systematic plant breeding and selection program is continually working to improve, as well as maintain, established varieties and to develop new varieties to meet the ever changing demands of the industries that we serve.

Our success in meeting the challenge of bacterial and virus diseases may be measured by the numerous inherently resistant varieties and strains that our plant breeders have developed. The advent of the frozen foods industry necessitated the creation of new varieties of peas, beans and sweet corn to meet the needs of this new form of food preservation. Mechanical harvesting of beans poses a new problem that is being resolved by our bean breeding and selection program.

The changing pattern of customer demand requires that we continuously breed for an improvement in sieve sizes of peas and beans, deeper and narrower kernel character in corn, uniformity of maturity and a multitude of other characteristics. As specialists in the breeding of peas, beans and sweet corn, our new introductions are designed to meet the specific needs of our customers.

Commence of the commence of th

DR. M. E. ANDERSON

The man responsible for our pea and bean breeding program is Dr. M. E. Anderson. His many new and improved varieties released during the last twenty years have greatly benefited the trade that we serve. Many of his varieties have become standard items in both the general seed industry and the food processing industry.

DR. FRANKLIN L. BLANKENBURG

Dr. F. L. Blankenburg, in charge of our sweet corn breeding program, is rapidly bringing to the stage of commercial production a series of new hybrids of outstanding merit. Trials from about the nation have proven the worth of these new hybrids and it remains only to build them into salable quantity.

Pods 4 to 5 inches, broad, flat, dark green, streaked with red. Stringless. Seed: Cream splashed with red.

GARDEN VARIETY

SEMINOLE

62 Days

Pods 6 inches long, round, straight, smooth, dark green, and stringless. Developed at Everglades Experiment Station of the University of Florida. Claimed resistant to common mosaic, rust and mildew. Seed: Brown mottled.

GARDEN & CANNING VARIETY

SLENDERGREEN (Rogers)

56 Days

An excellent bush bean with pods 6 inches long, round, straight, slim and dark green. Stringless. Uniform maturity. Seed: Purple splashed with buff. Similar to Tendergreen in color with slimmer, smoother pod.

GARDEN & CANNING VARIETY

SLENDERGREEN (Rogers)

STREAMLINER (Granda)

50 Days

Pods are 7 to 8 inches long, flat, tender in early stages and stringless. Seed: White.

GARDEN VARIETY

STRINGLESS BLACK VALENTINE

55 Days

Pods are 6 inches long, narrow, oval, dark green, good quality, stringless. Seed: Black.

GOOD SHIPPER

STRINGLESS RED VALENTINE

54 Days

Pods are 5 inches long, round, somewhat curved. A selection from Red Valentine. Seed: Red spashed with buff.

GARDEN VARIETY

New Introduction

IMPROVED SUPERGREEN

A new and improved Mosaic Resistant strain of our original Supergreen.

IMPROVED SUPERGREEN (Rogers)

58 Days

This new strain of Supergreen retains the heavy pod set of our original release, but now has the advantage of being MOSAIC RESISTANT. Pods are 6 to 7 inches long, slim, smooth, round, dark green and stringless. Seed: Light brown mottled with buff.

WALLES OF THE STATE OF THE STAT

BEANS—BUSH GREEN POD

TENDERGREEN, IMPROVED Rogers Mosaic Resistant Strain A hardy, more productive improvement

TENDERGREEN, IMPD. (Rogers)

56 Days

Pods are 6 inches long, round, dark green, straight and stringless. This strain is MOSAIC RESISTANT, and is preferred for FREEZING. Seed: Brownish purple, mottled fawn.

GARDEN & FREEZING VARIETY

TENDERGREEN No. 32304 (Rogers)

56 Days

Pods are 6 inches long, round, dark green, straight, stringless, and MOSAIC RESISTANT. Pod is more perfectly round than Imp. Tendergreen. This strain is preferred for CANNING. Seed: Brownish purple, mottled fawn.

GARDEN & CANNING VARIETY

New Introduction

TENDERWHITE

Our new white seeded variety in the Tendergreen class

TENDERWHITE (Rogers)

60 Days

This new bean has been bred primarily to meet the processors' demands for a high yielding, uniform color cut bean with low fiber content and adapted to mechanical harvesting. Pods are 51/2 to 6 inches long, slender, round, straight, smooth, dark green and stringless. MOSAIC RESISTANT. PURE WHITE SEED.

TENNESSEE GREEN POD

52 Days

Pods are 7 inches long, very broad, flat, dark green.
Stringy. Very popular in the South. Seed: Broad,
flat, dark brown.
GARDEN VARIETY

TOPCROP

TOPCROP

52 Days

Vine is 15 to 17 inches high. An early maturing variety with concentrated pod set and high yield. Pods are 51/2 inches long, stringless, round, dark green. Mosaic Resistant. Seed: Brown with buff mottle.

Hybridizing beans in our greenhouse at Idaho Falls, Idaho. This is the first step in the development of an improved bean variety.

WADE'S BUSH

ALL AMERICA GOLD MEDAL AWARD.

WADE'S BUSH

65 Days

Pods 51/2-6 inches long, straight, meaty, dark green and stringless. Seed: Purple-Brown. Mosaic Resistant. Adapted for Freezing.

New Introduction

WADEX

An attractive new bean with a prolific set of dark green pods of excellent quality.

WADEX (Rogers)

60 Days

A new variety similar to Wade's Bush but higher in yield, earlier in season and more uniform in pod setting. Pods are 6 inches long, straight and dark glossy green. Slightly slimmer and rounder than Wade's Bush. MOSAIC RESISTANT. Seed: Purplebrown.

BEANS—BUSH WAX POD

BRITTLE WAX (Round Pod Kidney)

BEANS—BUSH LIMA

Clark's Bush Lima Bean Production, Caldwell, Idaho

BEANS-BUSH LIMA

CLARK'S BUSH

67 Days

Resembles Henderson Bush in plant and pod but has green cotyledons. It is a heavy yielder. Pods three inch, curved, flat, dark green with three to four beans. Seeds small and mainly pale green.

CANNING & FREEZING VARIETY

FORDHOOK, CONCENTRATED

72 Days

Plants are stocky without tendrils. The majority of pods are set in the lower portion of the plant. Pods and seeds are slightly smaller than Regular Fordhook. Very prolific. Seed: Creamish green and light green.

CANNING & FREEZING VARIETY

FORDHOOK 242 BUSH

70 Days

A top ranking All-American vegetable. Similar to Regular Fordhook but pods are shorter and uniformly curved. Most pods contain four seeds that shelled are identical to regular Fordhook. 242 has outstanding ability to set under adverse conditions, particularly in high temperatures. Excellent quality. Recommended for freezing. Seed: Creamish green and light green.

HENDERSON BUSH

65 Days

Bush 16 inch, erect, runnerless, dark, glossy green. Pods 31/2 inch, curved, flat, dark green with 3 to 4 beans. Seed: Small, white, flat.

CANNING & FREEZING VARIETY

IMPROVED EARLY THOROGREEN BUSH

65 Days

Bush 16 inches, erect, runnerless, dark, glossy green. Pods 31/2 inches, curved, flat with 2 to 4 beans. Same habits as Henderson Bush, except for distinguishing feature of green cotyledons. Seed: Green except for lighter shades bleached.

CANNING & FREEZING VARIETY

CONTRACTOR CONTRACTOR

Seed Testing Laboratory—Idaho Falls, Idaho

Bagging a tassel for inbreeding at our hybrid sweet corn research station at Caldwell, Idaho.

BURBANK BANTAM

88 Days

Ears 8 inches, with 12 to 14 rows of deep, yellow kernels. Equal in flavor to 8 row Bantam. Stalks 51/2 to 6 feet. Produces well under adverse conditions. Among the best of the open pollinated varieties for garden and market.

CARMELCROSS (Hybrid)

75 Days

Ears 71/2 to 8 inches, 12-16 rows broad, medium depth yellow kernels. Stalks 5 to 51/2 feet. An early midseason, widely adapted hybrid giving a high yield of good quality corn for market, garden and for early canning and freezing. Originally released by the Connecticut Experiment Station.

COUNTRY GENTLEMAN

95 Days

Ears, 7 to 8 inches. Deep, white, slender, kernels with no row formation. Tender, sweet, excellent flavor. Small cob. Flag leaves. Stalk 61/2 to 71/2 feet. Used primarily for home gardening.

COUNTRY GENTLEMAN ILL. NO. 13

COUNTRY GENTLEMAN ILL. No. 13 (Hybrid) 95 Days
Ears 81/2 inches with narrow, deep, white kernels.
Stalk 8 feet. Has white interior silk and excellent holding qualities. A high yielding, top quality Country Gentleman Hybrid developed by W. A. Huelsen of the University of Illinois.

GOLDEN BANTAM 8 ROWED

87 Days

Ears 6 to 8 inches with 8 rows of kernels. Usually produces two ears per stalk. Stalks 51/2 to 6 feet. An excellent selected strain. Hardy and well known, variety for home garden.

GOLDEN BEAUTY

1955 ALL AMERICA SILVER MEDAL WINNER.

GOLDEN BEAUTY (Hybrid)

72 Days

A new early, yellow market and home garden hybrid introduced by Mr. W. H. Lachman of the University of Massachusetts.

Stalks 5 feet. Ears 7-8 inches long and slightly tapered, with 12-14 rows of medium width, good yellow, kernels. This hybrid yields well and has good quality factors. Maturity is approximately a day earlier than Marcross.

THE PARTY OF THE P

SWEET CORN

GOLDEN CROSS BANTAM

GOLDEN CROSS BANTAM (Hybrid)

88 Days

Ears 8 to 81/2 inches with 12 to 14 rows of golden kernels. Sweet and tender. Heavy yielder, resistant to wilt. Very uniform. Stalk 6 to 61/2 feet. A hardy top quality corn. The foremost yellow hybrid on the market today. Very wide range of adaptability. Used for garden, market, canning and freezing. Developed by Glenn M. Smith of Purdue University and the U.S.D.A.

GOLDEN EARLIPAK

GOLDEN EARLIPAK

73 Days

Developed in our breeding program for first early canning and freezing use, but equally suited for market planting. Especially adapted to areas where short growing season precludes use of slower maturing hybrids.

Stalk 6-61/2 feet. Ears 81/2 inches, predominantly 12 rows and with tender and sweet kernels of medium depth and good yellow color. A good yielding early hybrid adapted for mechanical harvesting.

GOLDEN HARVEST (Hybrid)

88 Days

A yellow hybrid developed by Glenn M. Smith of Purdue University and the U.S.D.A. Very similar in plant, ear type, kernel character, yield and season to Golden Cross Bantam, but has important advantage of white silks inside husks. Ears are more cylindrical, filled better at ear tips and straighter rowed than Golden Cross. High percentage of perfect ears for corn-on-the-cob pack.

Very uniform 8 inch ear, 12-14 rows. Kernels medium width and depth. Stalk 6 to 61/2 feet. For garden, market, canning and freezing.

SWEET CORN

New Introduction

GOLDEN HYBRID G101

GOLDEN HYBRID GIOI

74 Days

This new hybrid maturing in Marcross season offers a combination of high yield and improved flavor and tenderness seldom found in an early corn.

Stalks 6 feet, sturdy and with few tillers. Good tolerance to bacterial wilt. Ears 71/2-8 inches, mostly 12 rows and with long husk cover of medium green color. Attractive husked ear appearance. Kernels have good uniformity, glossy yellow color, medium width and depth.

Normally will produce two good ears per plant. Adapted for use as an early home garden, market, canning and freezing corn.

GOLDEN NUGGET

GOLDEN NUGGET (Hybrid)

88 Days

A Rogers introduction for the canning and freezing trade. A high yielding midseason, yellow hybrid of exceptionally good quality.

Stalk 71/2 to 8 feet, I to 2 tillers, ears borne well up from the ground level for ease of harvesting. Easy snapper. Ears 8 to 81/2 inches, cylindrical, 14 to 16 good uniform rows, long husk cover. Kernels medium yellow, medium width and depth, very tender and sweet.

IOANA (Hybrid)

89 Days

Ears 81/2 inches, very uniform, cylindrical, with 12-14 straight rows of medium width, light yellow kernels of excellent quality. Sturdy 7-71/2 foot stalk with few tillers. A high yielding hybrid for canning and market gardening. Developed and released by Dr. E. S. Haber of Iowa State College.

IOCHIEF

IOCHIEF (Hybrid)

90 Days

An outstanding yellow hybrid developed by Dr. E. S. Haber of Iowa State College. Iochief has a top rating on basis of yield and cutting percentage. Excellent performance under drought conditions. Good flavor and tenderness.

Stalk 7 to 71/2 feet and virtually tillerless. Ears set well up on stalk for ease of harvesting. Ears 81/2 to 9 inches long, cylindrical, filled to tips and with 16 to 20 rows of very deep, narrow kernels. A clean silker. Good husk coverage. Holds prime quality well in the field.

High yield, top cut per ton, good color and quality plus refined kernel character combine to make lochief an ideal canning and freezing hybrid.

LINCOLN (Hybrid)

85 Days

Ears 8 to 81/2 inches with 14 to 18 rows, medium narrow kernels. Stalks 61/2 to 7 feet, erect, resists lodging and ears borne high. A cross of inbreds P39xC23. Primarily for market gardeners wanting large early ears. Good yielder. Developed by the Connecticut Agricultural Experiment Station.

MARCROSS C 13x6 (Hybrid)

73 Days

Ears 7 to 71/2 inches with 10 to 14 rows of rather large, yellow kernels. Fairly good quality. Stalks 5 to 51/2 feet. An early garden and market corn well known in all corn growing areas. A prolific producer. Introduced by the Connecticut Agricultural Experiment Station.

MARCROSS NORTHERN

80 Days

Ears 7 to 8 inches with 12 to 14 rows of medium width, yellow, deep kernels. Sweet, tender. Stalks 51/2 to 6 feet. A large eared, early corn for market garden.

Hybrid Sweet Corn Production Field Caldwell, Idaho

CONTRACTOR CONTRACTOR

SWEET CORN

New Introduction

MELLO-GOLD

MELLO-GOLD (Hybrid)

82 Days

Our new development for an early canning and freezing corn. Holds well in the field and gives good cut corn recovery.

Very sturdy 6 to 61/2 foot stalk with good root system. Very few tillers. Lodging resistant and drouth tolerant. Ears 8-81/2 inches. 12-16 rows of medium width, bright, glossy yellow kernels of good quality. Yields well. Very tolerant to Stewart's Wilt.

New Introduction

MELLO-GOLD, WHITE SILK

MELLO-GOLD, WHITE SILK (Hybrid)

82 Days

This new hybrid offers improvement over our original Mello-Gold in that it has better husk cover, white inner silk, longer ear, higher row number and slightly deeper kernels. Desirable factors of quality, early maturity, high yield and glossy yellow kernels have been retained.

Very sturdy 6-61/2 foot stalks with very few tillers make this hybrid well adapted to mechanical harvesting.

Ears 81/2-9 inches long with 14-16 rows of mediumnarrow kernels of good depth. Recommended for both processing and market.

SWEET CORN

NARROWGRAIN EVERGREEN ILL. 14x11 (Hybrid)

93 Days
Ears 8 inches with 18 to 22 rows of deep, slender, white kernels of fine quality. A few flag leaves.
Stalk 8 feet. Good yield. Produces a more refined kernel than 14 x 13. Originated by W. A. Huelsen of the Illinois Agricultural Experiment Station. A garden and canning hybrid.

NARROWGRAIN EVERGREEN ILL. 14x13 (Hybrid)

P3 Days
Ears 8 inches with 16-20 rows of very deep, medium
width, white kernels. A good quality Narrowgrain.
Few flag leaves. Stalk 8 feet, well rooted. A high
yielding canning hybrid. Originated by W. A. Huelsen of the University of Illinois.

PROSPECTOR

PROSPECTOR 90 Days

A prolific golden hybrid developed for the mar-

A prolific, golden hybrid developed for the market and processing trade. Has high cutting percentage and attractive, refined kernel character.

Stalk 8 feet, few tillers. Ears 8-81/2 inches, 14-18 rows, uniform and with long husk cover. Kernels medium yellow, narrow, deep and of good quality. Normally produces two good ears set well up from ground for easy harvesting.

SPANCROSS (Hybrid)

69 Days

Ears medium 6 to 7 inches with about 12 rows of yellow kernels. Uniform in maturity and good quality. Stalk 41/2 to 5 feet, stocky, ears set low. Extra early, wilt resistant and somewhat resistant to cold. A firstearly garden hybrid originated and released by the Connecticut Agricultural Experiment Station.

STOWELLS EVERGREEN

95 to 100 Days

Ears 8 to 9 inches, 16 rows of deep, white kernels. Stalk 8 to 81/2 feet with very few suckers. Bred from selected, hardy strains. A high yielding, large eared Stowells for market and gardening.

STOWELLS EVERGREEN (Hybrid)

95 Days

Ears 81/2 inches with 16 to 20 rows of medium width, white kernels. Stalk 8 feet with very few tillers. Good quality. Narrower kernels, more uniform in plant type and maturity than open pollinated Stowells Evergreen.

TENDERGOLD

76 Days

Ears 7 to 8 inches with 12 to 14 rows of golden kernels of medium width and depth. Sweet, tender, fine quality. Stalks 51/2 to 6 feet. A hardy strain of satisfactory yield for canning, market or home garden.
